DIFFERENTIATORS:

- Precision & Professionalism: Committed to high-quality results and reliability.
- Community Impact: Aiming for meaningful contributions to local communities.
- Comprehensive Expertise: Offers a range of services, including heavy landscape construction and ecological restoration.
- Eco-Conscious Approach: Focus on sustainable practices and environmental stewardship.
- Service-Disabled Veteran-Owned & Operated: Infuses military values and discipline into each project.

COMPANY OVERVIEW:

Semper Fi Land Inc, founded in 2004 by U.S. Marine Corps veteran Roberto Velazquez, is an ecological and land services contractor in the Chicago area. The company emphasizes integrity, professionalism, and precision, evolving from a residential business to a trusted firm in ecological restoration, heavy landscape construction, and snow management. With a skilled team and specialized equipment, they focus on restoring natural systems, supporting resilient communities, and promoting long-term environmental health.

CORE COMPETENCIES:

1) Ecological Restoration:

- Shoreline restoration (rivers, ponds, streams, & lakes)
- Natural areas management (invasive species control, selective woodland clearing)
- Prescribed burn management,
- Native seeding & Tree, Shrub & Plant Installation
- Habitat enhancement
- Wetland Restoration

2) Heavy Landscape Construction:

- General contracting for land services, earthwork including sediment, erosion control, excavation and grading.
- Habitat improvement, shoreline stabilization, and storm water management
- Traditional landscape implementation including retaining wall & hardscape installation, plant installation, and landscape maintenance.

3) Snow Management Services:

- Snow & ice control to ensure safety and accessibility.

4) Sustainable Solutions:

- Commitment to enhance & protect the communities & environments that we work in.

PAST PERFORMANCES:

Here are some of our standout projects that showcase our finest work.

• **Buffalo Creek Forest Preserve:**

Created 70 acres of wetlands, added over a mile of multiuse trail, and installed a water control structure. With 5 years management and a USACE signoff.

• **Sugar Creek Golf Course Restoration:**

Stream stabilization, construction, wetland creation, sediment & debris removal, grading, seeding, planting, & site restoration following 3 years of management. This was a 2-time award winner, American Public Works Association in the environmental category less than \$5 million and the Jane Foulser Habitat Award.

• **Hammel Woods Dam Modification:**

Removed a low-head dam, stabilized banks, enhanced with rock, built a canoe/kayak launch, & installed native seed.

• **Lake Opeka Shoreline Restoration:**

Features a 40-acre lake, stabilized approximately 5,500 linear feet of shoreline, & includes a 3-year landscape management plan, 7 fishing piers, 12 aquatic shelves, & 0.75 miles of asphalt trail

• **Forked Creek Envirolock Soil Bags:**

Stabilized over 600 linear feet of streambank using various techniques, including stone toe, gabion baskets, envirolock soil bags along with native plant installation.

• **Abraham Lincoln Presidential Library**

Removed existing landscape, installed new soils and over 11,000 new plants.
